Minneapolis, MN and Toronto, ON, August 5, 2020 - Ceridian HCM Holding Inc. ("Ceridian" or the "Company") (NYSE:CDAY) (TSX:CDAY), a global human capital management ("HCM") software company, announced today its financial results for the second quarter ended June 30, 2020. All financial results are reported in U.S. dollars unless otherwise stated. A reconciliation of U.S. generally accepted accounting principles ("GAAP") to non-GAAP financial measures has been provided in this press release, including the accompanying tables. An explanation of these measures is also included below under the heading "Use of Non-GAAP Financial Measures."

"Our second quarter financial performance was strong, and the business continues to perform well," said David Ossip, Chairman and Chief Executive Officer of Ceridian. "We are seeing increased demand for Dayforce as employers accelerate technology investments to increase productivity, to ensure the physical, mental, and physical health of employees, and to drive hard dollar returns for their businesses."

The average U.S. dollar to Canadian dollar foreign exchange rate was \$1.39, with a daily range of \$1.34 to \$1.42, for the three months ended June 30, 2020, compared to \$1.34, with a daily range of \$1.31 to \$1.35, for the three months ended June 30, 2019. As of June 30, 2020, the U.S. dollar to Canadian dollar foreign exchange rate was \$1.36. To present the performance of the business excluding the effect of foreign currency rate fluctuations, the Company presents revenue on a constant currency basis, which we believe is useful to management and investors. We have calculated revenue on a constant currency basis by applying the average foreign exchange rate in effect during the comparable prior period.

CERIDIAN

Business Outlook

Based on information available to us as of August 5, 2020, we are issuing the following guidance for the third quarter of 2020:

- Dayforce recurring services revenue of \$118 million to \$120 million, or an increase of approximately 8% to 10% on both a GAAP and constant currency basis. Excluding float revenue, Dayforce recurring services revenue is expected to grow approximately 14% to 16% on both a GAAP and constant currency basis.
- Dayforce revenue of \$155 million to \$158 million, or an increase of approximately 8% to 10% on a GAAP basis and 8% to 11% on a constant currency basis. Excluding float revenue, Dayforce revenue is expected to grow approximately 12% to 14% on a GAAP basis and 13% to 15% on a constant currency basis.
- Cloud revenue of \$173 million to \$177 million, or an increase of approximately 5% to 7% on a GAAP basis and 5% to 8% on a constant currency basis. Excluding float revenue, Cloud revenue is expected to grow approximately 9% to 11% on a GAAP basis and 10% to 12% on a constant currency basis.
- Total revenue of \$198 million to \$203 million, or a decline of approximately 2% to flat on a GAAP basis, and a decline of approximately 1% to an increase of approximately 1% on a constant currency basis. Excluding float revenue, total revenue is expected to grow approximately 2% to 5% on a GAAP basis and 3% to 6% on a constant currency basis.
- Float revenue of approximately \$7 million within Dayforce revenue, \$9 million within Cloud revenue, and \$10 million within total revenue.
- Adjusted EBITDA of \$27 million to \$32 million.

Our third quarter 2020 guidance assumes an average U.S. dollar to Canadian dollar foreign exchange rate of \$1.36, compared to an average rate of \$1.32 in the third quarter of 2019. We have not reconciled the Adjusted EBITDA range for the third quarter of 2020 to the directly comparable GAAP financial measure because applicable information for the future period, on which this reconciliation would be based, is not readily available due to uncertainty regarding, and the potential variability of, depreciation and amortization, share-based compensation expense and related employer taxes, changes in foreign currency exchange rates, and other items.

While we are not providing guidance for the fourth quarter given the uncertainty in the market, we believe that the greatest impact of COVID-19 will be reflected in the third quarter of 2020. Assuming employment levels continue to improve, we expect Dayforce recurring services revenue growth, excluding float revenue and on a constant currency basis, to accelerate and to exceed 18% in the fourth quarter.

Use of Non-GAAP Financial Measures

We use certain non-GAAP financial measures in this release including Adjusted EBITDA, Adjusted EBITDA margin, Adjusted net income, and revenue on a constant currency basis. We believe that Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income, non-GAAP financial measures, are useful to management and investors as supplemental measures to evaluate our overall operating performance. Adjusted EBITDA and Adjusted EBITDA margin

CERIDIAN

are components of our management incentive plan and are used by management to assess performance and to compare our operating performance to our competitors. We define Adjusted EBITDA as net income before interest, taxes, depreciation, and amortization, as adjusted to exclude gain (loss) on assets and liabilities held in a foreign currency other than the functional currency of a company subsidiary, share-based compensation expense and related employer taxes, severance charges, restructuring consulting fees, and other non-recurring charges. Adjusted EBITDA margin is determined by calculating the percentage Adjusted EBITDA is of total revenue. Adjusted net income is defined as net income, as adjusted to exclude release of the valuation allowance, gain (loss) on assets and liabilities held in a foreign currency other than the functional currency of a company subsidiary, share-based compensation expense and related employer taxes, severance charges, restructuring consulting fees, and other non-recurring charges, all of which are adjusted for the effect of income taxes. Management believes that Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income are helpful in highlighting management performance trends because Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income exclude the results of decisions that are outside the normal course of our business operations.

Our presentation of Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income are intended as supplemental measures of our performance that are not required by, or presented in accordance with, GAAP. Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income should not be considered as alternatives to operating profit, net income, earnings per share, or any other performance measures derived in accordance with GAAP, or as measures of operating cash flows or liquidity. Our presentation of Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income should not be construed to imply that our future results will be unaffected by similar items to those eliminated in this presentation. Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income are included in this discussion because they are key metrics used by management to assess our operating performance.

Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income are not defined under GAAP, are not measures of net income, operating profit, or any other performance measures derived in accordance with GAAP, and are subject to important limitations. Our use of the terms Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income may not be comparable to similarly titled measures of other companies in our industry and are not measures of performance calculated in accordance with GAAP.

Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP.

In evaluating Adjusted EBITDA, Adjusted EBITDA margin, and Adjusted net income, you should be aware that in the future we may incur expenses similar to those eliminated in this presentation.

We present revenue on a constant currency basis to assess how our underlying businesses performed, excluding the effect of foreign currency rate fluctuations, which we believe is useful to management and investors. We calculate revenue on a constant currency basis by applying the average foreign exchange rate in effect during the comparable prior period. Dayforce revenue per customer is calculated on a constant currency basis by applying the prior year average exchange rate to all comparable periods.
